Information Systems graduate with strong experience in backend development, API integration, and system design. Skilled in building scalable web applications and solving real-world technical problems through structured analysis, debugging, and prototyping. Experienced in working with REST APIs, databases (SQL/NoSQL), and cloud-based systems. Demonstrates growing interest in AI-driven solutions, including Retrieval-Augmented Generation (RAG), LLM integration, and automation workflows. Able to communicate technical concepts effectively to both technical and non-technical stakeholders. Strong analytical thinking, problem-solving ability, and leadership experience with a commitment to building reliable and well-documented systems.

Education Level

Del Institute of Technology - Laguboti, Sumatera Utara <i>Bachelor of Information Systems, GPA : 3.35/4.00</i>	Aug 2022 - Sep 2026
--	---------------------

WORK EXPERIENCE

Solution Engineer (Internship/Project) – Remote / WFH PT. Hutabyte Abhinaya Inovasi	Jun 2026 - Present
- Developed Unified Ticket Tracker, an automated backend system using Node.js designed to streamline and route external operational requests to the IT department. - Integrated AI capabilities for intelligent ticket classification and text processing, reducing manual categorization effort and improving routing accuracy.	
Web / IT Internship – Bogor, West Java PT. ELTAMA PRIMA INDO	Jul 2025 - Aug 2025
- Engineered a centralized enterprise web application using Svelte and Directus Headless CMS to digitize company-wide operations. - Designed relational database schemas and integrated RESTful APIs to manage backend data flow across ERP and internal management modules. - Implemented secure authentication mechanisms and Role-Based Access Control (RBAC) to enforce multi-level administrative permissions.	
Junior Cyber Security – Independent Study (MBKM) PT. Vinix Seven Arium	Feb 2022 - Oct 2026
- Conducted vulnerability assessments using tools such as Nessus, OpenVAS, and Wireshark. - Performed system hardening and security analysis based on OWASP standards. - Worked with SIEM tools (Wazuh) for monitoring and incident analysis.	

Project Experience

BEACON – Unified Ticket Tracker (Hutabyte)	Jul 2026 - Aug 2026
- Architected a centralized system to automate multi-channel ticket intake (Telegram, Email, Manual) and streamline L2 support workflows. - Integrated real-time synchronization with ClickUp alongside automated SLA monitoring and escalation tracking. - Developed an AI Assistant using Dynamic Hybrid RAG to query ticket metrics and fetch operational SOPs from Outline.	
Tourism Recommendation System (Final Year Thesis)	Feb 2026 - Apr 2026
- Developed a hybrid recommendation engine integrating Retrieval-Augmented Generation (RAG) and Cache-Augmented Generation (CAG) to deliver optimized regional tourism recommendations. - Designed data pipeline orchestrators, vector chunking algorithms, and caching mechanisms to reduce latency and improve query retrieval accuracy.	
WalletNotes – Mobile Finance & Task Management App	Jan 2026 - Present
- Developed a cross-platform mobile application using Flutter and Dart for personal finance and task management. - Implemented CRUD operations for income and expense tracking with automatic balance calculation. - Designed expense analytics feature with category-based chart visualization. - Built task management system with priority levels and reminder functionality.	

PT. Eltama Prima Indo Integrated Web System - Engineered a centralized multi-module enterprise web application using Svelte and Directus CMS to streamline company-wide operations - Developed core modules including ERP (Production, Inventory, Sales, Finance), Daily Project Reporting, Internal Helpdesk, and E-Recruitment Portal - Integrated an Asset & Maintenance Management System to automate equipment servicing schedules, work orders, and asset cost tracking.	May 2025 - Jul 2025
Web Application Penetration Testing (MBKM Project) - Executed black-box penetration testing on the Almudaya Research Institute web platform using tools such as OWASP ZAP, Arachni, Nmap, SQLMap, and Gobuster. - Identified, analyzed, and classified web vulnerabilities including Reflected XSS, CSRF, missing HTTP security headers, and SSL/TLS misconfigurations. - Authored a comprehensive technical audit report detailing Proof-of-Concept (PoC) exploits and actionable mitigation strategies according to OWASP security standards.	Feb 2025 - May 2026
BEM Website Development - Developed a student organization (BEM) website using React.js for the frontend and Golang for the backend. - Implemented RESTful APIs, authentication, and role-based access control. - Collaborated in a team environment using Git for version control and followed modular, maintainable code practices.	Sep 2025 - Dec 2025
Streamlit Machine Learning Web App) - Implemented and deployed a predictive machine learning model using Random Forest algorithms on Streamlit. - Created dynamic visualization dashboards enabling interactive exploration of key model metrics and datasets.	Mei 2025 - Jun 2025
RecipeRipple Website Development - Designed database structures, including ERD, SQL, API, scripts, and normalization procedures. - Built backend API and integrated frontend features - Focused on creating user-friendly interfaces and implementing secure web functionalities	Aug 2024 - Dec 2024

Organisational Experience

President of the Student Executive Board (BEM) Institut Teknologi Del - Lead and oversee all BEM activities and initiatives. - Coordinate with various student organizations and university departments to implement student programs. - Represent student interests in university meetings and discussions.	Sep 2024 - Jan 2026
Information Systems Student Association (HIMSI) <i>Member of the Arts Division</i> - Contributed to the planning and execution of artistic events and activities for HIMSI. - Collaborated with other divisions in organizing and promoting student events.	Oct 2023 - Feb 2024

Skills

- Hard Skills** : SQL, PHP, Python, Java, Javascript, Laravel Framework, HTML and CSS, React.js, Flutter, Design, Figma, Svelte Framework, Directus, Cryptography, OWASP
- Soft Skills** : Critical Thinking, Analytical Thinking, Problem Solving, Communication Skills, Attention to Detail, Time Management, Adaptability, Collaboration, Documentation Skills
- Languages** : Fluent in Indonesian ; Intermediate in English.
